N.Y.City.

Gentlemen:-

We are in receipt of your valued favor of Nov.the 11th,confirming your telephone communication with writer in regard to the wants of the North Carolina Granite Corpn.,and we immediately took the matter up by telephone with our Philadelphia office,requesting them to hunt these people up,but was surprised to have them answer that Mr.Hendricks was in their office at that time getting data in regard to this crane.

We appreciate very much indeed your kindness in calling our attention to this,and we are taking the matter up with them.

Respectfully yours,

MANNING,MAXWELL & MOORE.

These partitions have been in use for more than ten years and have been used by leading Architects for many of the largest office buildings in the United States.

The ***Keystone Fireproof Floor*** is lighter and cheaper than any other reliable floor that gives a flat ceiling, and as its use involves less dead weight it shows marked economy in the amount of structural steel required.

It has experienced the severest fire, water and load tests without failure.

It is delivered at the building in a dry and finished state and is erected without centres or high-priced labor.

FIREPROOF WOOD

ELECTRIC FIREPROOFING COMPANY

19th STREET AND EAST RIVER, NEW YORK

This Company's product is the only one in existence receiving the unconditional approval as a fireproof material by the Department of Buildings in New York City.

This is the ONLY company fireproofing wood successfully for the United States Navy Department to-day—its product having passed all naval requirements. During the last nine years this Company has furnished fireproofed wood for over one hundred warships for the United States Navy, as well as for several battleships for the Russian Navy.

This Company EXCLUSIVELY furnishes fireproofed wood for railroad and trolley car construction in the United States, where absolute fireproofed wood is required to prevent combustability on short circuits.

This Company EXCLUSIVELY furnishes fireproofed wood to the Hale & Kilburn Manufacturing Company of Philadelphia for railroad car seats and other furniture.

This Company is employed to fireproof all the wood used in the electric locomotives now being constructed by the American Locomotive Company, for the New York Central and Hudson River Railroad Company's new electric motive power equipment.

This Company has furnished V. J. Hedden & Sons, Contractors for the Metropolitan Life Insurance Company's new building, Twenty-third Street, hundreds of thousands of feet of fireproofed oak, mahogany and birch, for the interior trim, which is considered the most beautiful finished fireproofed wood in New York.

This Company is NOW furnishing hundreds of thousands of feet of fireproofed wood for the Rapid Transit Subway Company's Hotel Belmont, on Forty-second Street.

Among the prominent buildings in New York City furnished with fireproofed wood by this company are: The R. G. Dun Building, Atlantic Mutual Insurance Company's Building, Commercial Cable Building, Flatiron Building, Hotel Martinique, Kuhn-Loeb & Co.'s Banking Building, Blair Building, Queen's Insurance Building, Jewelry Building, corner Maiden Lane and Broadway, and Metropolitan Life Insurance Company's Building, 23d St. and 4th Ave.

The Electric Process is being operated in London, Paris, Montreal, Canada, and for GOVERNMENT WORK BY THE UNION IRON WORKS, SAN FRANCISCO, and Newport News Ship Building Company, Newport News, Va.

"THE PIONEER PROCESS FOR THE FIREPROOFING OF WOOD."

76 Elm Street,

New York City, N.Y.

Gentlemen:-

Referring to the directory recently obtained from you, entitled "Hendricks' Commercial Register of the United States", we beg to compliment you on the full and accurate information contained in the same. We are familiar with the merits and defects of the average directory, as we have had occasion to use them very often and we know the amount of labor and care requisite in order to select out the really representative and best names.

In our experience this cannot be done by clerks, and the book bears evidence of painstaking collaboration on the part of the principal himself, which makes all the difference in the world to the user. We have had occasion lately to go into new lines of contracting, and we found your directory extremely valuable as representing the very latest and most modern contractors' appliances, which in view of the improvements made almost monthly, are otherwise difficult to learn about right down to date.

In addition we wish to express our appreciation of the painstaking and courteous personal attention given us on the part of your principals, which was of the greatest assistance. We consider that this feature along with the excellence of the information classified, should make your directory of the greatest value to both sellers and users.

We beg to add that we take pleasure in writing this, wholly without suggestion.

Very truly yours, yours,

EFM:C - 10.30 A.M.

MAZE

MAZE PATTERN OF ROLLED GLASS

for the diffusion of light, and as there are no right angles to catch and hold the dust but each interstice begins and ends on the surface, it has the additional advantage of being easily cleaned.

For use in Offices, Public Buildings and Private Residences, instead of Enameled, Ground and Chipped Glass in doors, transoms and inside work.

Florentine, Ondoyant, Syenite, Figured No. 1, No. 2 and No. 3 are also popular patterns of Figured Glass.

Design sheet and samples may be had on application, or they can be procured from any of the leading Jobbers in Glass in the United States.

The Coulson Patent Store Front Construction

The Coulson Patent Corner Posts and Transom Bars are being specified by the leading architects throughout the country, for new or remodeled store-fronts. Greatest strength for holding plate glass safely, and at the same time causing the least obstruction to light. In using them all glass is set from the outside. Recommended by the Plate Glass Insurance Companies.
Write for latest descriptive Catalogue, C 300.

FLORENTINE

FLORENTINE PATTERN ROLLED GLASS

for use in Offices, Public Buildings and Private Residences, and instead of Enameled, Ground and Chipped Glass in doors, transoms and inside work.

This Glass has a wide reputation for having an exceptionally smooth cutting surface, is brilliant, easily kept clean, artistic in design, intercepts the vision and greatly increases the diffusion of light.

Maze, Ondoyant, Syenite, Figured No. 1, No. 2 and No. 3, are also popular patterns of Figured Glass.

Design sheet and samples will be sent on application or they can be procured from any of the leading Jobbers in Glass in the United States.

When drawing specifications be particular to specify glass made by the MISSISSIPPI GLASS COMPANY, designating the pattern selected as shown above.

¼ inch Ribbed Wire Glass.

WIDE AWAKE ARCHITECTS and BUILDERS now deem WIRE GLASS as indispensable in modern fire-proof construction.

This is owing to its PROVEN fitness as a fire retardant as shown by repeated special scientific tests and also by its behavior in actual fires.

BOMMER SPRING HINGES

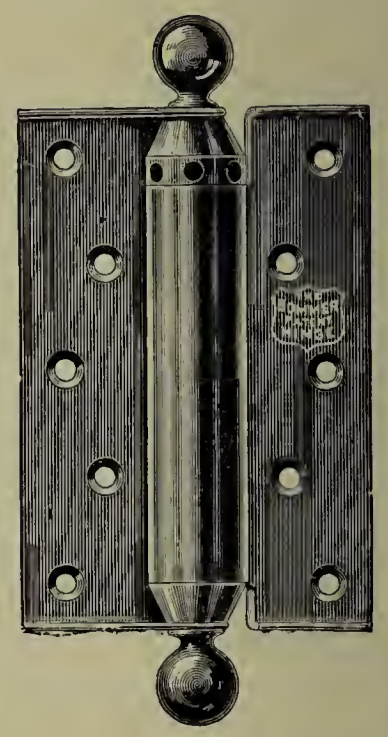
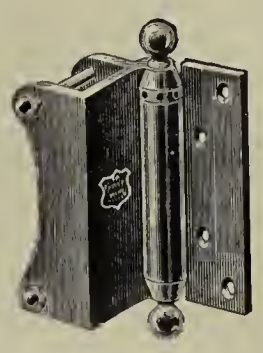
ARE QUALITY GOODS



THEY CLOSE DOORS AUTOMATICALLY.

Double Action.

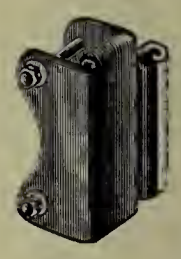
Brommer Floor Spring Hinge.



Single Action.

DON'T ERR IN JUDGMENT when buying spring hinges, which of all hardware perform the hardest work. Bommer Spring Hinges never fail to give satisfaction and have withstood the test of time. "PRACTICALLY UNBREAKABLE" says the World's Fair Award, Chicago, 1893.

BOMMER BOX FLANGED SPRING HINGES AND STRIKES



ARE THE STANDARD GOODS FOR LAVATORY DOORS.

Flexible Steel Armored Steam and Air Hose.

THE LATEST ADVANCE IN THE ART.

It consists of a high grade rubber hose, covered with a substantial yet flexible steel armor. The steel armor protects the hose from mechanical injury and encases it so tightly that it prevents expansion, thus prolonging the life of the hose, and if a break in the rubber hose occurs the rupture is bound by the armor so that only a small part of the steam or air pressure is lost. A rupture in the ordinary steam or air hose results in a complete loss of pressure. Write for further information to

THE WINGET CONCRETE MACHINE CO., 409 The New Hayden Bldg., COLUMBUS, O.

The Winget Machine

For making hollow concrete building blocks is the only AUTOMATIC, ADJUSTABLE and PERFECT working machine yet produced. It is widely adjustable, making blocks for walls from four to eighteen inches thick, as well as many special designs. It is practically a combination of TWENTY machines in ONE. The saving of time, material and labor with this machine actually pays its price in a short time. If you are interested, write for catalogue and special information.
